

## Training Specialist

### The Company

Resonant Medical researches, develops and markets 3D ultrasound image-guided adaptive radiotherapy products. Our goal is to enable fundamental improvements to radiation oncology treatment planning, verification and delivery. Resonant's RESTITU™ platform features significant advances in ultrasound hardware and software imaging to fully harness the advantages of 3D ultrasound for radiation therapy image guidance. The first offering of the RESTITU™ platform is a tumor position verification and patient alignment system, and a wide number of additional products and technologies are currently under development.

### Position Description

The training specialist will enable the use of Resonant's products by customers' organization. The specialist will design, document, and provide high quality training to a broad array of audiences, including Radiation Therapist, Medical Physicists, and Physicians. Representing the company to such a wide variety of customers at various cancer centers and hospitals, he/she will assume a key role in ensuring complete customer satisfaction, perfect integration of Resonant's image-guidance platform across these diverse clinical environments, and complete mastery of our product by its users. Excellence will be attained by providing dynamic, clear, efficient and thorough training sessions and material, well adapted to the specific user needs. On occasion, providing attentive, high-quality assistance to medical professionals that will have a positive impact on the company's reputation.

The specialist's responsibilities will include:

- Plan, organize and direct a wide range of training activities, from conventional presentations, to field exercises, to online simulation
- Design and continuously update the company's training material and curriculum
- Participate in the coordination and scheduling of training sessions
- Adapt training to specific user needs (radiotherapists, vs physicists, vs dosimetrists etc.)
- Deliver training session on customer site or in office as required
- Plan and coordinate the participation of experts (e.g. ultrasonographers, medical physicists, etc) in the training sessions
- Eventually, supervise teams of trainers

### Position Description (continued)

- Occasionally, provide customer support and assistance, answer to questions, follow-up to training
- Occasionally, convey customer feedback to engineering to help product improvements and development

### Qualifications

- Degree and clinical experience as Radiation Therapist, Dosimetry or other specialties related to radiation oncology
- Experience in customer support and training for a medical equipment company an asset
- Excellent oral and written communication skills
- Comfortable with small group presentations
- Good interpersonal skills
- Track record of working well with people
- Dynamic, personable
- Professional, responsible, trustworthy
- Deep commitment to customer satisfaction
- Driven, self started individual motivated to work and prosper in a high-growth, high-technology medical company in the Radiation Oncology sector
- Interest in technology, IT and various technical advances
- Ideally, comfortable with graphical and multimedia documents and material
- Willing and able to travel

Please send inquiries and resumes by email and indicate for which position you are applying.
